OBJECTIVE

Computer Science undergraduate with strong foundations in Data Structures, Algorithms, Object-Oriented Programming and Web Development. Seeking a Summer Internship at Cisco to apply software engineering skills while building scalable and user-centric applications.

EDUCATION

Bachelor of Technology (Computer Science & Engineering), Jaypee Institute of Information Technology
Expected 2028

Class XII (CBSE)

2024

Score: 77.4%

SKILLS

Languages	C++, Java, JavaScript, Python, SQL
Web Technologies	HTML5, CSS3, JavaScript
Tools	Git, GitHub, Android Studio, MySQL
Core Concepts	Data Structures & Algorithms, OOP, DBMS

EXPERIENCE

Frontend Developer Intern

May 2026 – July 2026

Tectigon IT Solutions

Online

- Developed responsive web dashboards using HTML, CSS and JavaScript for internship and employee management systems.
- Built a 7-page Intern Management Dashboard featuring task management, attendance, daily standups, learning resources, team directory and profile management.
- Implemented task filtering, search, responsive navigation and interactive UI components using Vanilla JavaScript.
- Collaborated with mentors to debug issues, optimize UI and follow Git-based development workflows.

PROJECTS

Tectigon Intern Hub (HTML, CSS, JavaScript). Developed a responsive 7-page internship management dashboard with modules for task management, attendance, standups, learning resources and profile management.

Sammarshya Employee Portal (HTML, CSS, JavaScript). Built an employee portal featuring Kanban task management, attendance tracking, leave management and browser-based data persistence using LocalStorage.

MindLog: Mental Health Journal App (Ongoing). Developing an Android application using Java, Android Studio, Room Database and SQLite with mood tracking and visualization features.

Terminal Social Network Analyzer (C++). Implemented Dijkstra's Algorithm, PageRank and Label Propagation using STL to analyze graph-based social network connectivity.

EXTRA-CURRICULAR ACTIVITIES

- Practice Data Structures & Algorithms to enhance coding and analytical skills.
- Develop personal web and Android applications using modern development tools.
- Actively explore emerging software engineering technologies and best practices.
